

These questions are due by the end of the week. 10/10 points towards your assessment grade if you get them all right and have the math work on paper to back up your work.

You will receive zero points and fail the assignment if you are asked for your work on paper and can not produce that effort. Missing some part of the assignment will cause a loss of that percent of the overall assignment.

These weekly problems cannot be attempted a second time and the work must be turned in on time, not later in the day, not during remediation, and not the next day.

You should work on these problems throughout the week and use down time in class to work with your teams on the solution to these problems.

1.

Standard A1.2.3.2.1

Vy asked 200 students to select their favorite sport and then recorded the results in the bar graph below.

Vy will ask another 80 students to select their favorite sport. Based on the information in the bar graph, how many more students of the next 80 asked are likely to select basketball rather than football as their favorite sport?

- A. 10
- B. 20
- C. 25
- D. 30

2. Write an equation in point-slope form of a pattern through (3, 4) and (-5, 1).

3. Look at the equation $y - 3 = \frac{2}{3}(x + 1)$.

What is the slope of this line? _____

What is the point that helped to form this equation? _____
